

Alexander Komissarov

Introduction

I started career at my current company back in 1997. In Freight forwarding and Supply chain I went up the ladder from an Operator to Branch manager. As Branch manager, I was deeply involved in both buying and selling processes, people management, KPI control and much more. 12 years ago moved to the Netherlands and started career in Information Technologies first as a Designer and later as Product Engineer.

I am a manager, who has work experience in four countries. Started leading team of 5 people. Grew up to successful completion of several Lean Six Sigma projects leading team of 30+ people.

Work experience

2013 - till now, JFHillebrand IT BV, The Netherlands

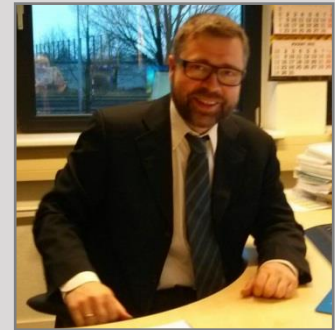

Product Management and Operations Supervision

- Product management of different software types, from carrier and customer interfaces (BizTalk based) to web-based track and trace and reporting systems;
- PBIs prioritization;
- SCRUM master;
- Provision of Demos;
- Design and development of Python based Data science projects for trends prediction in logistics;
- Lean Six Sigma projects management;
- People management;
- Work with SQL data bases, which includes software behavior route cause search;
- Set up of KPI rules and arranging operations quality control;
- Daily work with interfaces in XML, EDIFACT formats;
- Negotiations with product and development teams as of how and when to resolve the found issues;

2008 – 2013, JFHillebrand IT BV, Haarlem, The Netherlands

Software Designer

- Designed features of Quotes and Rates System;
- I was a bridge between business and technical team;
- Involved in full cycle of Software development;
- Basing on the logistics experience ‘on the fields’ developed user friendly GUI designs for the JFHillebrand Core forwarding system (TMS) - FLOW;
